RECYCLE REFRIGERANTS DAY

Many household items contain refrigerants, such as refrigerators, freezers, dehumidifiers, and air conditioners, as do nearly all automobiles, trucks, and motorcycles.

If you have an old appliance that contains a refrigerant, it must have the refrigerant removed by a certified professional before the appliance is discarded.

University Medical Center will hold its first annual *Recycle Refrigerants Day* on Saturday, April 16. Bring your old appliance to the parking lot of the Briarwood Mall, where certified Memphis Primary Materials personnel will remove the refrigerant, and then recycle the appliance. If you cannot get the appliance to the mall, call (901) 555-0862 before April 16 and volunteers will pick up the appliance. There is no cost for this service.
